  * Verify Gemini generates the legal content properly embedded with your inputs.

* In-App Editing:

  * Click Click to Edit Document.

  * Modify or add custom clauses in the text editor (e.g., adding text at the top).

  * Press Ctrl + Enter to apply.

* Export Testing:

  * Test Download as .TXT (opens plain text with structure).

  * Test Download as .DOCX.

  * Test Download as .PDF.

  * Verify exported files include logo header formatting and footer details.

Step 4: Presentation & Documentation Checklist

To finalize your project report or presentation deck:

* System Architecture:

  * Frontend: Streamlit (frontend/app.py)

  * Backend: FastAPI (legalEaseAPI/main.py)

  * AI Engine: Google Gemini API

  * Document Exporters: Python packages (python-docx, reportlab or fpdf for PDF)

* Key Features Checklist:

  * [x] Interactive web form for legal input metadata

  * [x] AI-backed document synthesis

  * [x] Real-time dark mode preview

  * [x] In-place document editing

  * [x] Multi-format export (.txt, .docx, .pdf)
